Addendum #1 Questions/Answers

For Sealed Bid –BearCat G3 Bid Id #152286

1. Under “UPGRADES:” is listed the term “Weapons Mount”, I looked at your current BearCat configuration and that item was not ordered. Most of our customers order the maximum number that can fit into a BearCat and that would be (6). They are positioned (2) at the front doors, (2) at the middle doors near the rear facing seats and (2) at the back wall on the passenger side. The question we have is: **how many weapon mounts should we include? 6 total weapon mounts.**

2. On your bid spec we see called out “Ballistic Skip Round Shield—BCBSRS—1”. I looked up your current BearCat configuration and it has (2)

Ballistic Skip Round Shields. The question we have is: **should we only quote (1) BCBSRS or do you want to review the quantity required? 2 ballistic shields in total.**

The reason we like to sell (2) is because they are 6-feet long and when putting them end to end that gives you 12-feet of cloaked area on whichever side of the BearCat your team might be exacting a rescue or evacuation. See the attachment showing them end to end.
