

Questions and Answers 8.30.2024

I do have a couple of follow-up questions that I missed asking during the conference. The unit your colleagues mentioned with an airflow of 643,500 CFM—does that figure refer to a single unit, or is it the total for multiple units combined? **Refer to the bid sheet for each properties units. The large values represent the total for a property, individual unit capacities have been provided on the spreadsheet.** Additionally, will your systems require servicing and refilling by our team, or will your team handle that?

I do have a couple of follow-up questions that I missed asking during the conference. The unit your colleagues mentioned with an airflow of 643,500 CFM—does that figure refer to a single unit, or is it the total for multiple units combined? **Refer to the bid sheet for each properties units. The large values represent the total for a property, individual unit capacities have been provided on the spreadsheet.** Additionally, will your systems require servicing and refilling by our team, or will your team handle that? **The bid requirements are to minimize our involvement. The expectation is for the vendor to fully service and support their product.**

On a related note, I was informed that I should be receiving some pamphlets related to the project, but I haven't seen them come through yet. If you could forward those to me when you have a moment, I'd appreciate it. I'm eager to start working on this as soon as possible. **I do not have any reference for "pamphlets".**
