

ADDENDUM I

RFB# 164616 HIGH LIFT LOADER W/ATTACHMENTS

QUESTION/ANSWERS

Does the High lift loader have to have a Hydrostatic transmission? If so, there is only one company that produces a machine with that particular type of transmission.

The High Loader does not have to have a Hydrostatic transmission; doesn't mean we won't choose one!

The fusion coupler that is mentioned is also a brand specific type of quick coupler, would a different coupler that performs essentially the same function be ok?

A different quick coupler will perform the same function and will be ok!

Does the machine have to have Parallel lift function?

The machine does not have to have the Parallel Lift function, The machine just must be able to lift 13ft!
